

CARONIA

April 11, 2000

Dear Mr. Davidson,

Found your lectures most
imaginative and interesting.
From statistical information to
small stories and humour it all
contributed to make the information
relevant and enjoyable to absorb.
And THE TOPIC - Very Relevant.

Look forward to reading "Breathing
Space" which I have scanned, and
listening to your tape.

Have decided to deliver this while
on board for "closure's" sake. Keep
up the informative information
dissemination.

And thanks for the tape - "earned"
through audience participation -
and book.

Ginnie Raycraft
